## Professional summary

**Frontend Developer** passionate about crafting beautiful, high-performance web applications using **React**, **Next.js**, and **Tailwind CSS**. I love building seamless, intuitive user experiences that feel effortless. Experienced in **Supabase** and **API integration** to streamline backend functionality. Always eager to **learn**, **adapt**, and **collaborate** in dynamic, fast-paced environments to deliver meaningful solutions.

## Professional experience

### Frontend Developer at Mașini la Cheie - remote

August 2022 - Present

- Spearheaded a **comprehensive frontend redesign** of the application using **React** and **Next.js**, resulting in a more modern, user-friendly interface and improved navigation.
- Collaborated on building a **high-traffic, SEO-optimized blog** with **fast load times** and **responsive design**, enhancing user experience and accessibility.

React, TypeScript, Next.js, Tailwind CSS, SCSS, Bootstrap, Ant Design, Material Tailwind, Postman, Github, Notion.

### Internships during University:

Full Stack Developer Intern at BK Hosting - Braşov, Romania for 2 months, July 2021 - August 2021

Full Stack Developer Intern at Mero - Craiova, Romania for 2 months, July 2020 - August 2020

Full Stack Developer Intern at CS Nine - Vienna, Austria for 1 month, October 2019 - November 2019

## Personal projects

[first2apply.com](#) is a desktop application designed to assist job seekers by sending **real-time job alerts** and simplifying job application management. I was responsible for building the entire **frontend** with **TypeScript**, crafting the user experience, ensuring a clean and intuitive interface across the platform and landing page. The project serves **70+ monthly paying users**, with **over 500 trials each month**, and has been well-received as an [open-source project](#) with **110 stars and 13 forks on GitHub**. Built using **React**, **Shadcn/UI**, **Tailwind CSS**, **Supabase**, and **Electron**, it emphasizes simplicity and usability to help users focus on their job search effectively.

[errands-manager.vercel.app](#) is a serverless task management app built with **React**, **Next.js**, **TypeScript**, **Tailwind CSS**, **Ripple UI**, and **Supabase** with a focus on creating a clean, responsive UI. It facilitates collaboration through **email invitations** and task organization, featuring **user authentication** and **real-time updates**. See more details on my [portfolio](#) under the "Projects" section.
